

## **LCMS course**

### **Code: IICB-LCMS**

LC-MS is an indispensable analytical technique frequently used in chemical synthesis, drug discovery program, forensic department etc. CSIR-IICB will offer a course on LCMS under the skill development program initiated by Govt. of India. This expanded analytical science training programme will develop your practical analytical knowledge and techniques for self-sustainability.

The course will cover-

- Principles and practical aspects of liquid chromatography
- Method development
- Sample preparation
- Modes of LCMS
- Qualitative and quantitative analysis
- Spectral interpretation of LC-MS
- Hands on training

Applications are invited for the above training course; we welcome applications from BSc, BPharm, MSc, MPharm qualified candidates.
